Domini Applicativi

- **Manifattura:** visione, riduzione dei tempi di produzione, riduzione dei costi di manutenzione, manutenzione predittiva, simulazione fluidodinamica, simulazione di produzione, predizione costi materie prime, etc.
- **Commercio / retail:** riconoscimento di comportamenti, generazione suggerimenti, etc.
- **Salute:** diagnostica, riconoscimento, classificazione, predizione, Virtual Assistant, riabilitazione, genomica, etc.
- **Robotica:** comprensione percorsi, classificazione, decisione, etc.
- **Sviluppo di soluzioni ICT:** coding/generazione, testing, etc.
- **Mobilità e Trasporti:** gestione flotte, routing, ottimizzazione, manutenzione, riduzione missioni, etc.
- **Ambiente:** emissioni, stima/identificazione perdite, raccolta rifiuti, etc.
- **Security in spazi pubblici:** visione, classificazione, predizione
- **Media:** classificazione, riconoscimento, ricerca img/video, comprensione del testo, etc.
- **Agricoltura:** visione, classificazione, predizione, controllo, etc.
- Etc.

A che serve l'Intelligenza Artificiale

• **Target:**

- Predizioni, early warning (anomaly detection)
- classificazione, riconoscimento
- Simulazione, ottimizzazione
- generazione di soluzioni

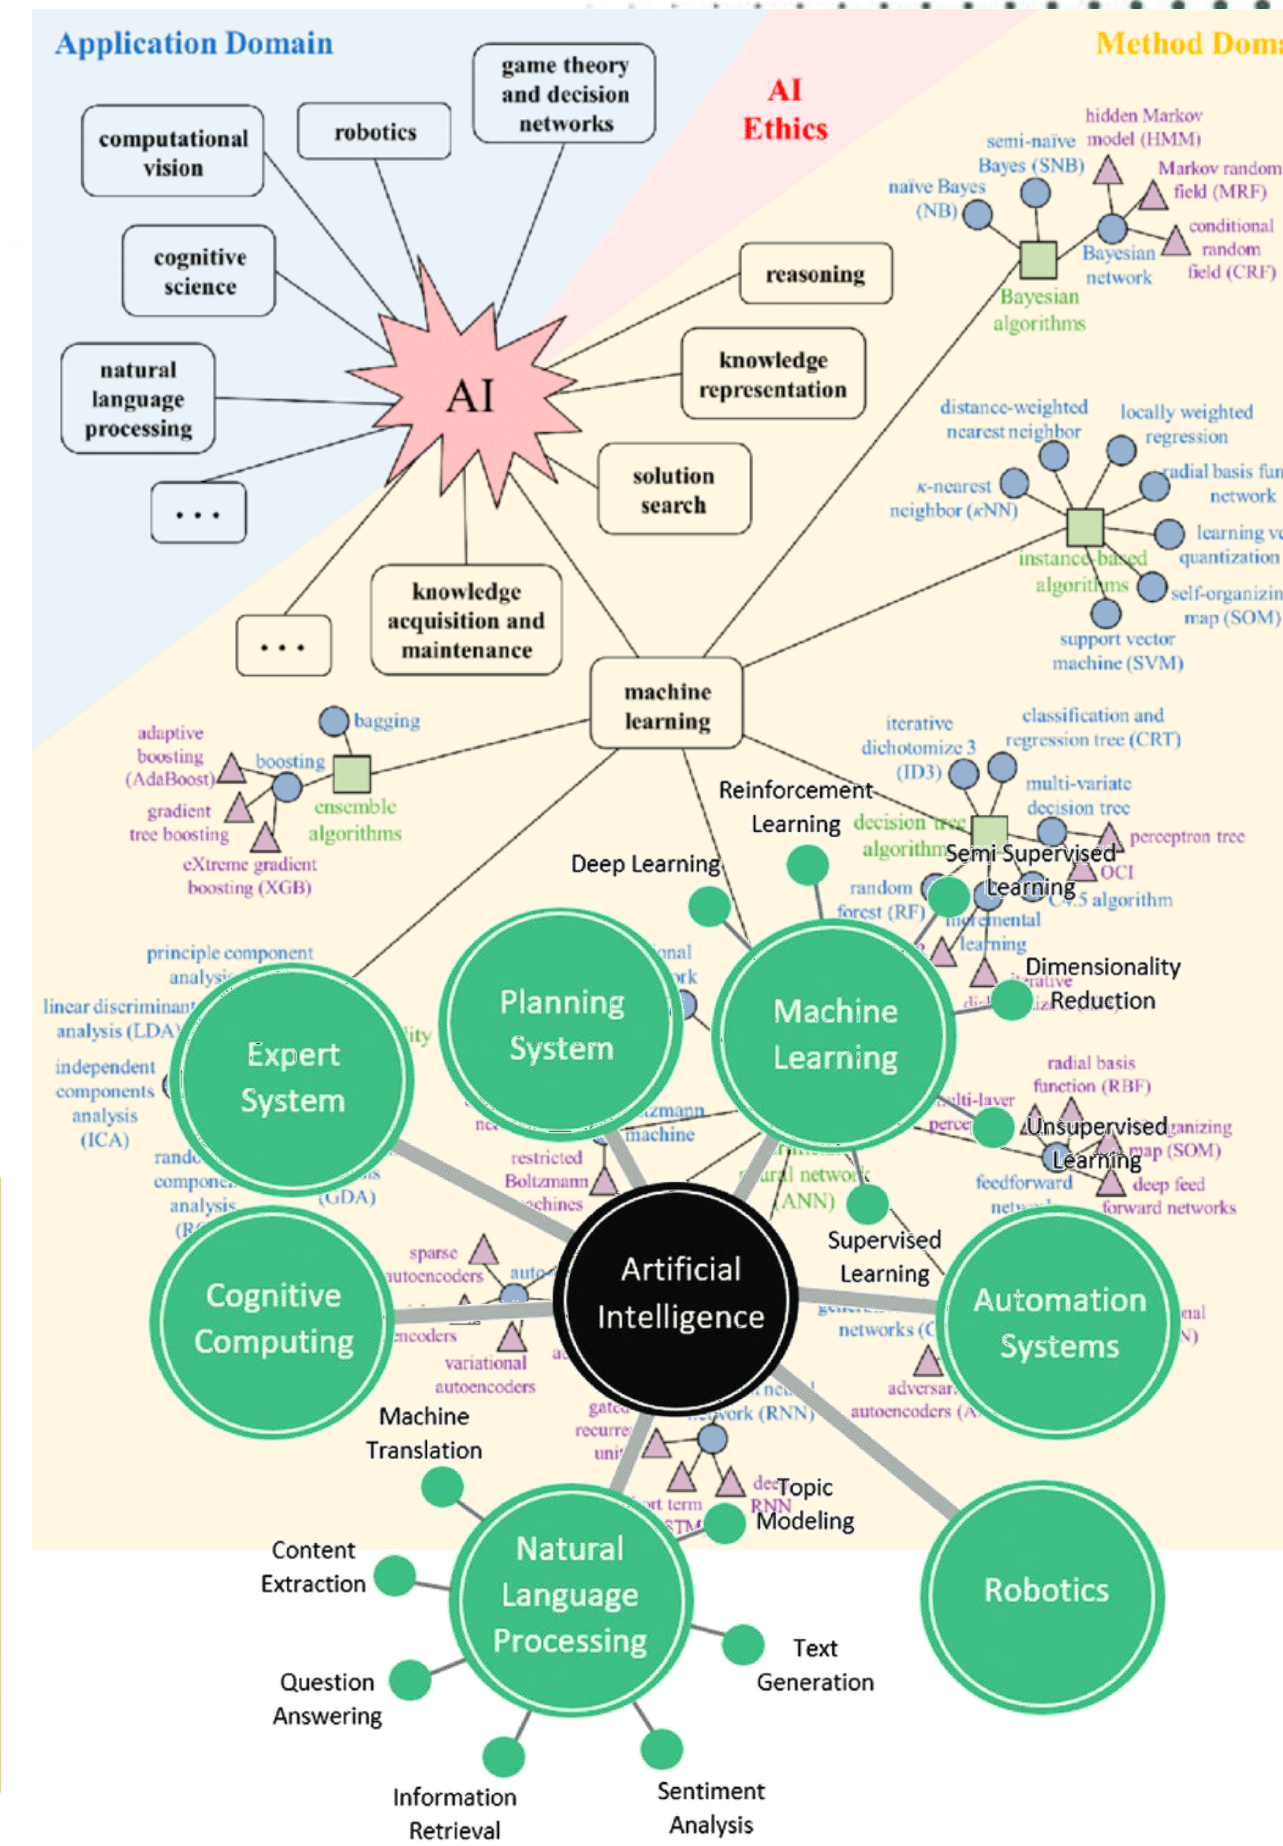

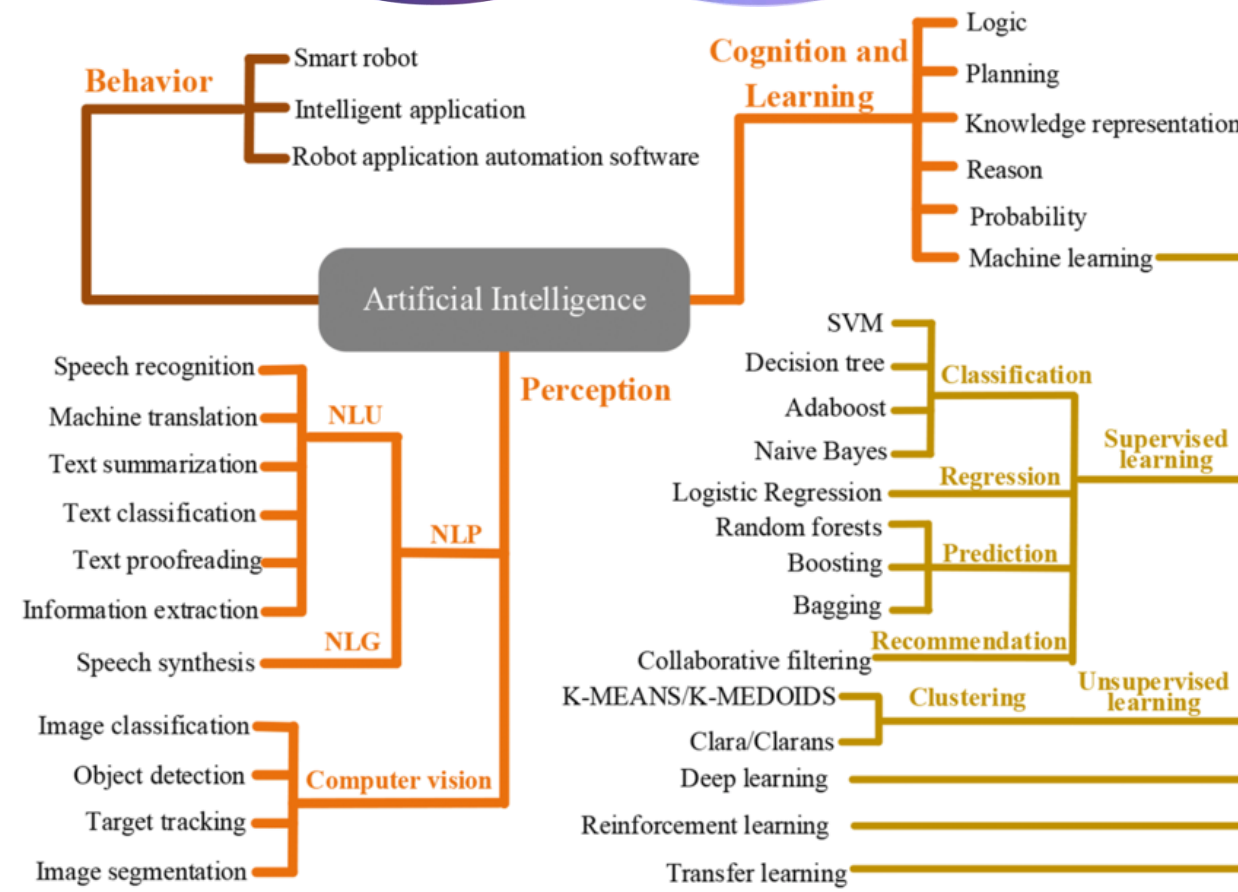

• **Dove la troviamo**

- **Operation and planning**
- Dashboards
 - Business/Visual Intelligence
 - What-if analysis
- Decision Support Systems

Che cosa è AI?

Parole chiave

MACROAREA	MICROAREA	KEYWORDS
<p>Artificial Intelligence</p>	<p>ML, KE, NLP, AI, RL, TL, FL, DL, XAI, BERT, GNN, GCN, PINN, GPT, LLM, CV/PR, clustering, etc.</p>	<p>Predictions, prescriptions, classifications, optimisations, etc.</p>
<p>Big Data, Data Analytic, Architectures</p>	<p>Scalability, GDPR, HPC, CPU/GPU cluster, big storage, Data Space, Data Models, Data Lake, Data warehouse, ETL/LT,..</p>	<p>What-if analysis, Visual Analytics, Business Intelligence, Visual Intelligence, MLOps, ...</p>
<p>Digital Twin Modeling and Execution</p>	<p>IoT, WoT, IoE, Metaverse, AR, VR, ... MicroServices, SOA, ...</p>	<p>Decision Support Systems, DSS, Simulation & Optimization</p>

- AI: Artificial Intelligence
- BERT: Bidirectional Encoder Representations from Transformers
- CV/PR: Computer Vision / Pattern Recognition
- DL: Deep Learning
- DSS: Decision Support Systems
- ETL/LT: Extract Transform Load/LD
- FL: Federated Learning
- FT: Fine Tuning
- GCN: Graph Convolutional Network
- GDPR: General Data Protection Regulation
- GIS: Geographic Information Systems
- GNN: Graph NN
- GPT: Generative Pretrained Transformer
- HPC: High Performance Computing
- IoE: Internet of Everything
- IoT: Internet of Things
- ITS: Intelligence Transport Systems
- KE: Knowledge Engineering
- LLM: Large Language Models
- ML: Machine Learning
- MLOps: ML Operation
- NLP: Natural Language Processing
- NN: Neural Network
- PINN: Physically Informed NN
- RL: Reinforced Learning
- TL: Transfer Learning
- WoT: Web of Things
- XAI: Explainable AI

Il processo di sviluppo

Data: IoT/WoT, Standards, modellazione, data space, formats, protocols, processes, etc.

- GDPR, AI-Act, Licensing, etc.

Artificial Intelligence Techniques and Life Cycle

- **AI Architecture:**

- Data mining, knowledge inference, ML (RF, XGBoost, ...),
- Deep Learning, Reinforced Learning, Generative AI, etc.

- **Comprensione:**

- Explainable AI (XAI), relevance (per esempio: SHAP, Lime)

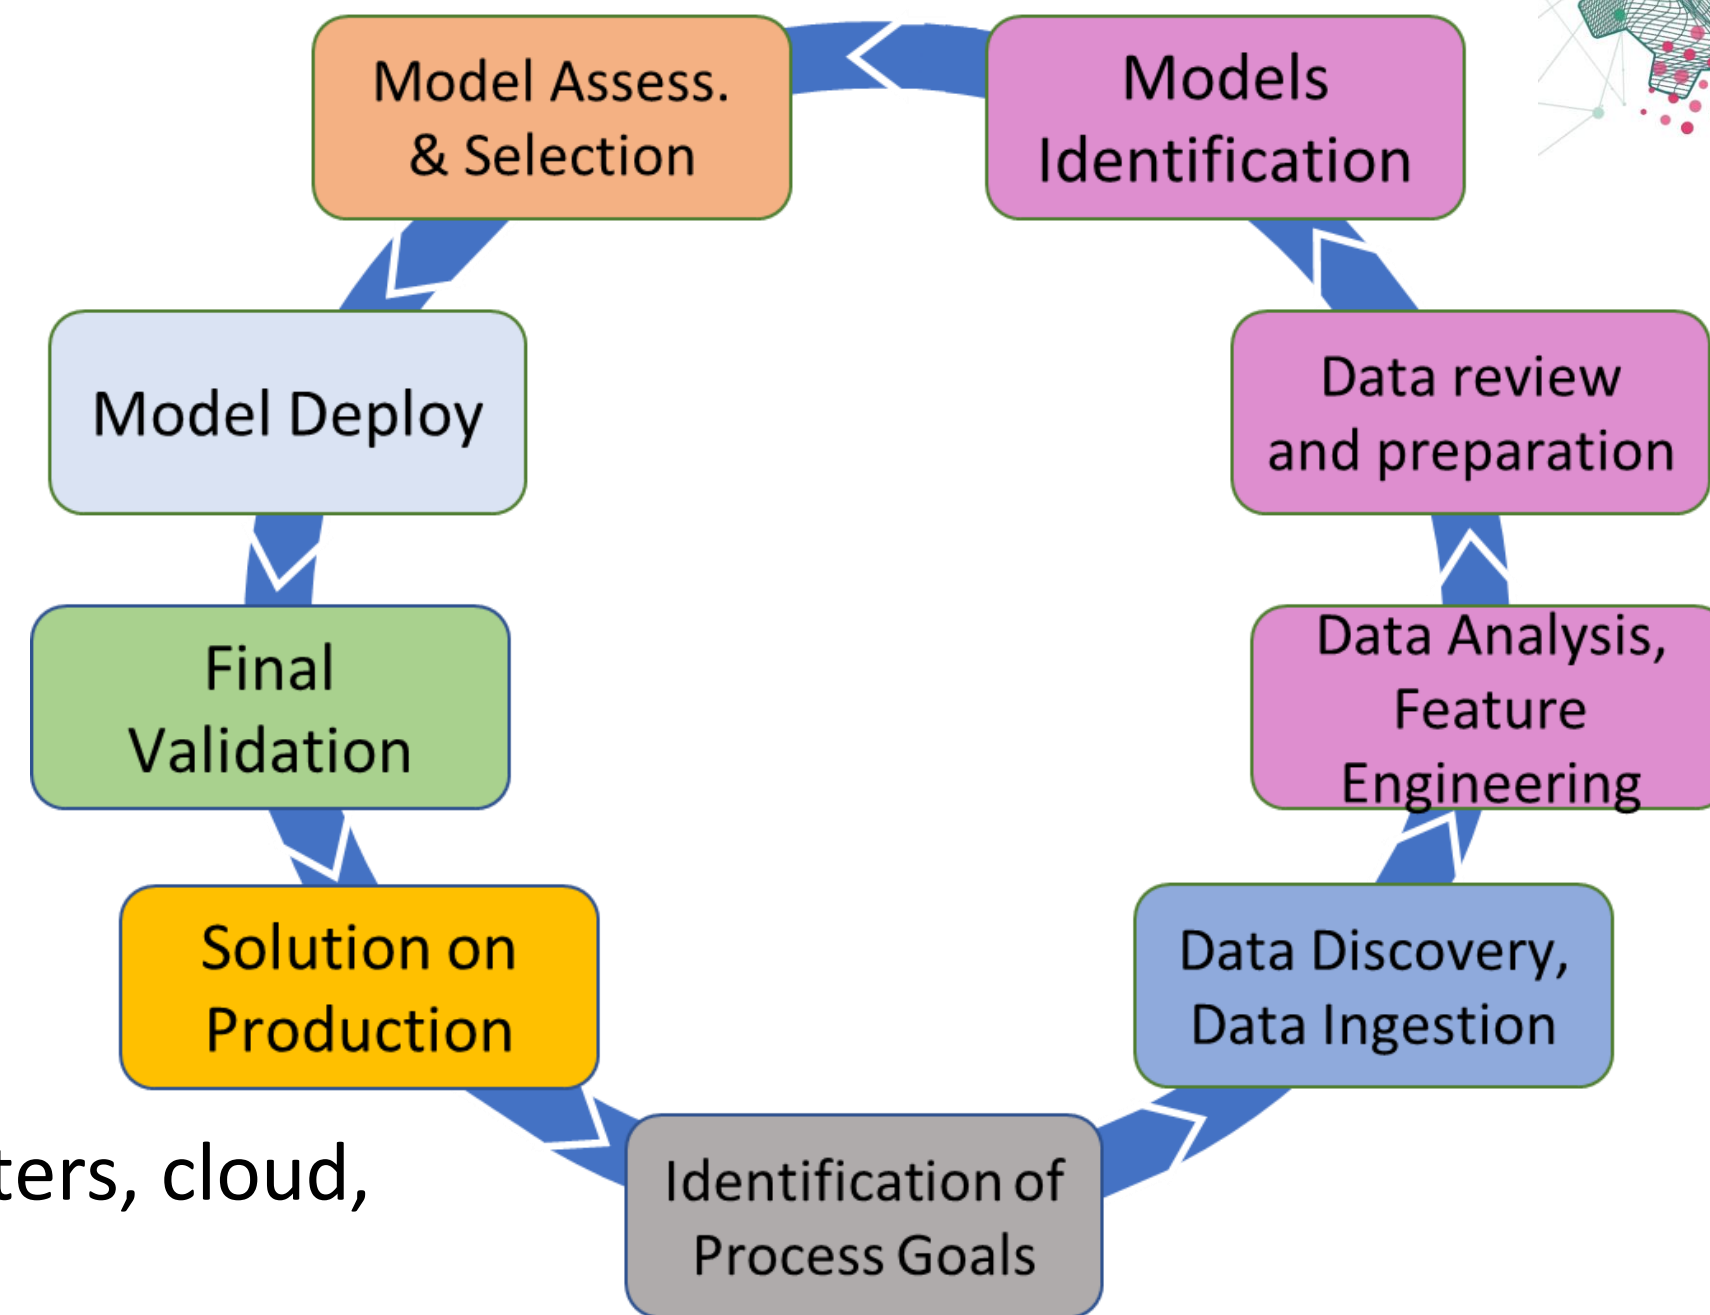

- **Riduzione dei costi di learning:**

- Fine tuning, transfer learning, federated learning, etc.

- **Ibridazione dei paradigmi:**

- Neuro-Symbolic, PINN, KB → NN, NN → KB

- **Tecniche di calcolo/arc.:** MLOps, HPC, CPU/GPU clusters, cloud, container, microservizi, SOA, etc.

Real Cases from DISIT Lab

- **Smart Manufacturing:** PINN per la fluidodinamica, etc.
- **Smart Retail:** raccomandazioni, suggerimenti per il retail,
- **User Behavior:** People Counting and Trajectories, termiche per la sicurezza, il conteggio e la stima di traiettorie, etc.
- **Predictive maintenance:** predizione della manutenzione in impianti a produzione continua
- **Predictions on Time Series:** traffic, pollution, presenze, parcheggi, consumi, costi, etc.; ALSO for **early warning:** accidents, maintenance, e
- **Routing Optimization:** reduction of costs, waste collection optimization, pooling, delivering optimization, optimisation of resources, etc.
- **Traffic Light Optimization:** semafori con RL, infrastrutture (generative AI)
- **What-if-Analysis and Infrastructure Optimization.**
- **Virtual Assistant:** text analysis e classificazione, predizione della probabilità di mediazione, richieste in linguaggio naturale su testi forniti con LLM
- **Digital Twin:** 3D production and optimized rendering, Virtual Reality, Augmented Reality, etc.
- **Smart Light Management:** gestione dell'illuminazione, profiling, adaptation on Traffic flow.
- **Etc.**

Smart Manufacturing

- **Autoclave:** curation process for: composite materials, rubber, ..
 - Reduction of computing costs for simulating load effect into the autoclaves curing process
 - Similar to design problems to be validated in wind galleries
- **Solving Navier-Stokes PDE** (partial differential equations) equation,
 - PINN plus new Transfer Learning techniques
 - Precision on steady and transitory cases
 - Validation wrt Open Foam
 - Reduction of computational time
- **Videos on** <https://www.snap4city.org/1010>

- **Goals and drivers:**

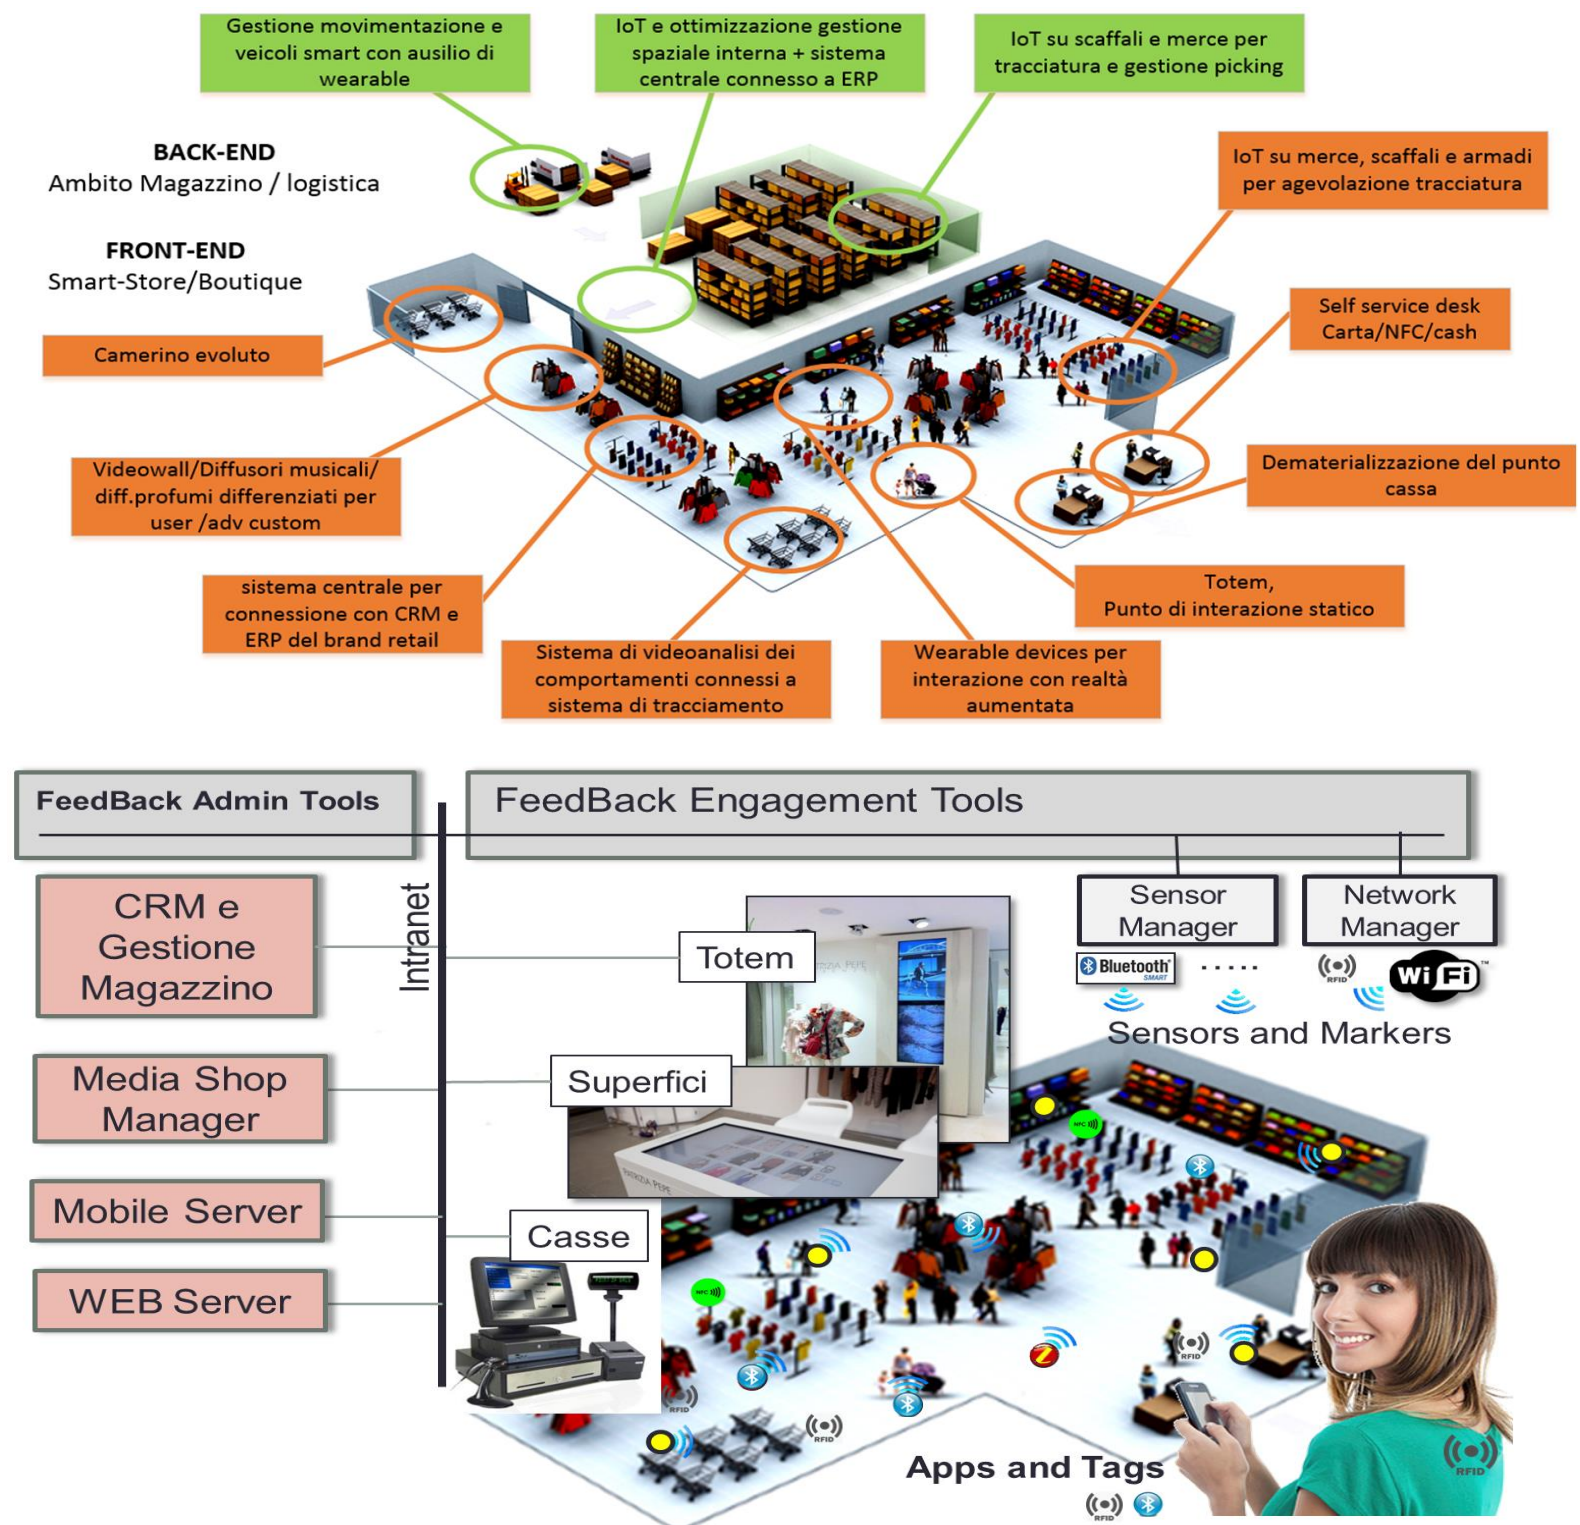

- adaptive user engagement,
- Improving customer experience
- Increasing of sales, understand use behaviour

- **How**

- Advanced user profiling, user behaviour analysis
- Predictive models for engagement
- IoT and integrated instrumentation
- Digital Twin of customer and related experience

- **AI injection**

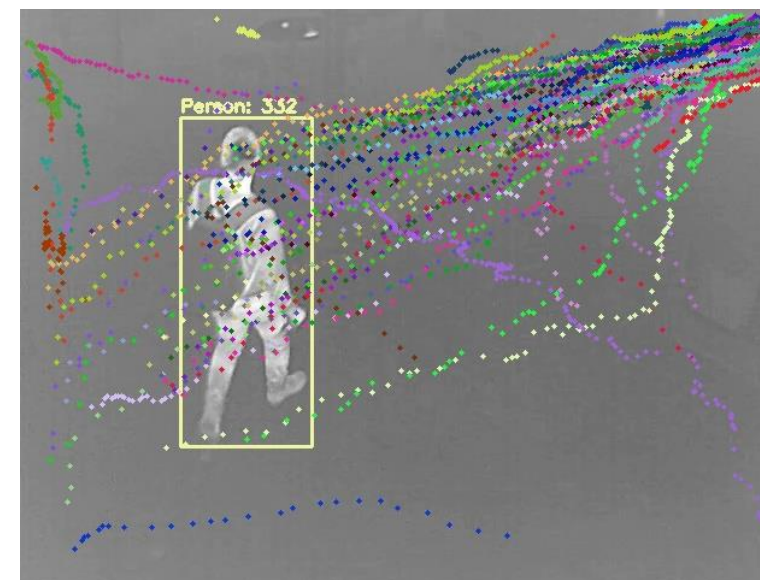

- Clustering of user, product, behaviour, ..
- Classification, recognition in real time
- Production of suggestion in real time (retail) and for on-line selling

User Behaviour: People Counting, Tracking, etc.

- **Analisi del comportamento** in spazi aperti o chiusi
 - HUB, metro, stazioni, linee di produzione, parcheggi, aree critiche nelle città,
 - centri commerciali, retail, etc.
- **Thermal Cameras**
 - GDPR compliant
- **AI injection**
 - classificazione e conteggio
 - Identification of critical situations
 - Early warning
 - Integrazione con PAX counters, e con dati ODM di operatori
- **Stima in tempo reale**
 - Direttamente sulla telecamera
 - Elevata precisione e affidabilità
 - Usate da: Cuneo, Firenze, Genova, etc.

Predictive Maintenance

Historical and Real Time Data

Synoptics for real time monitoring

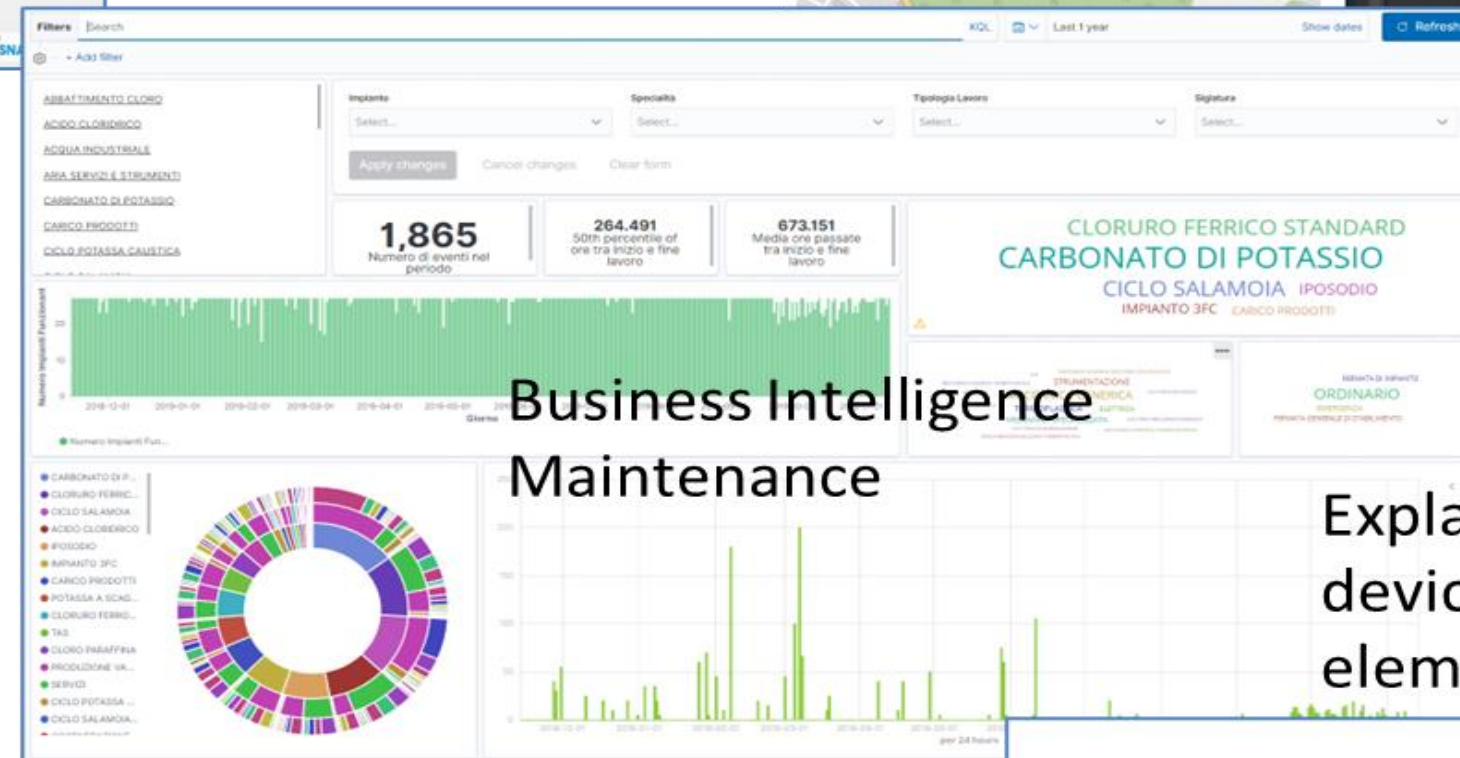

<https://www.snap4city.org/dashboardSmartCity/view/index.php?iddashboard=MzA1NA==>

Map and 3D BIM modelling to:

- represent the details
- associate physical elements with data

Explainable AI to map critical values of devices and detection to physical elements in the plant

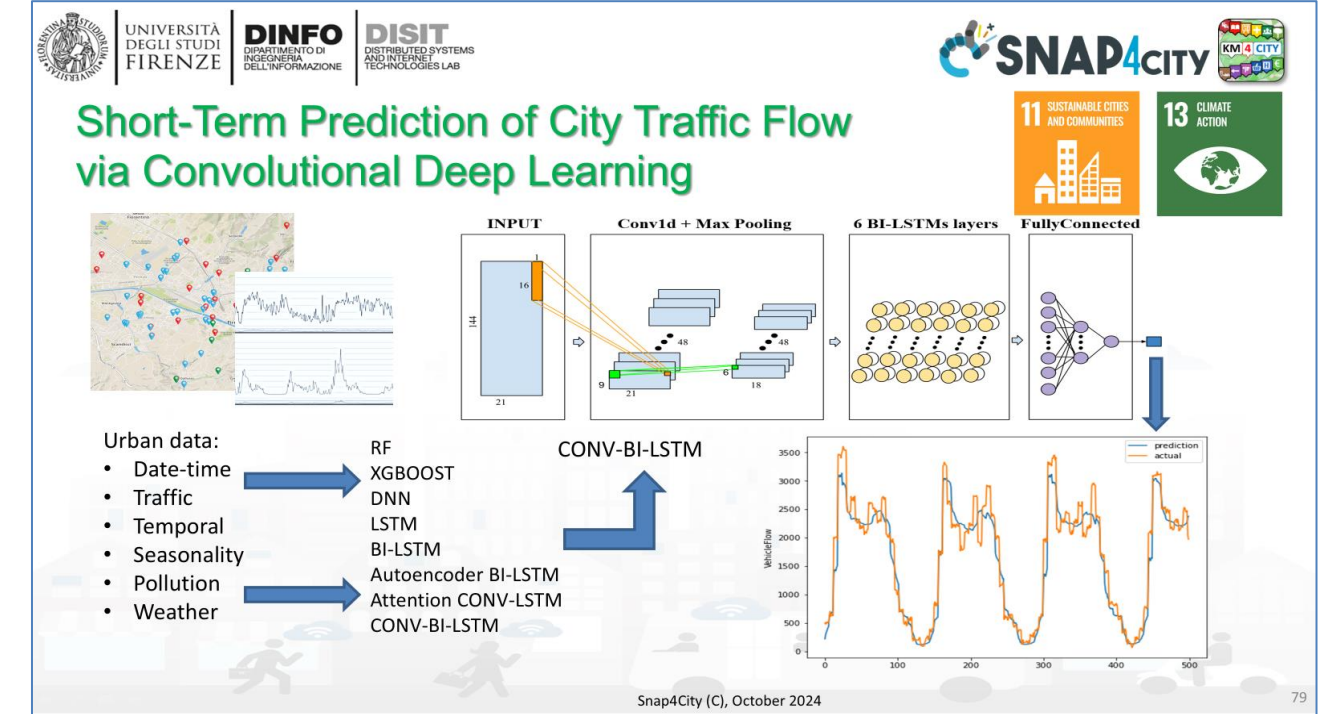

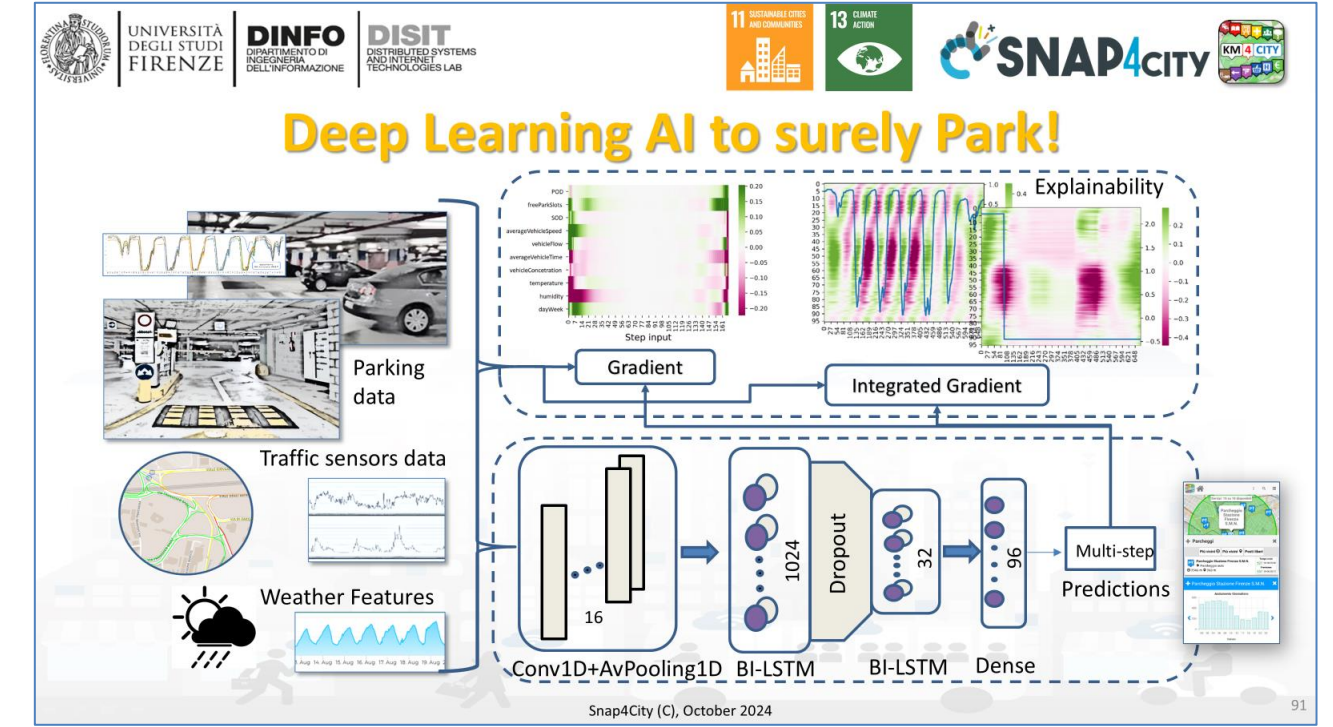

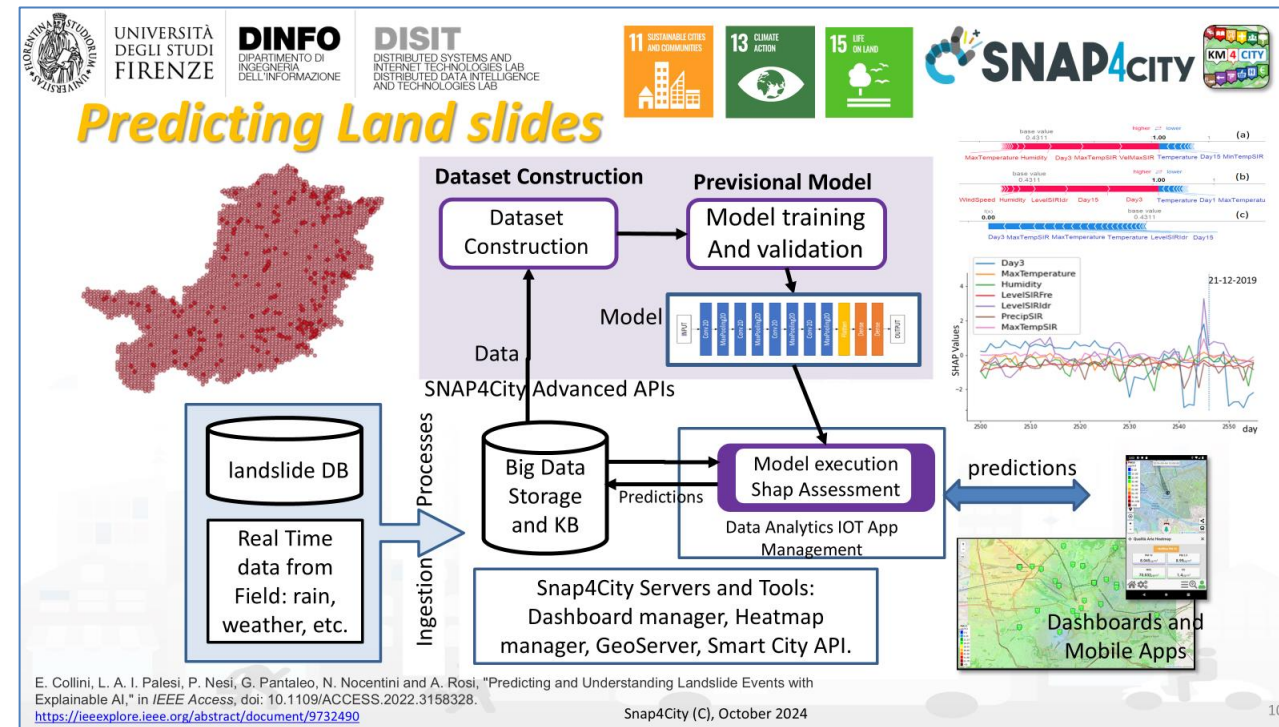

Predictions onselected.....

Aim in operation:

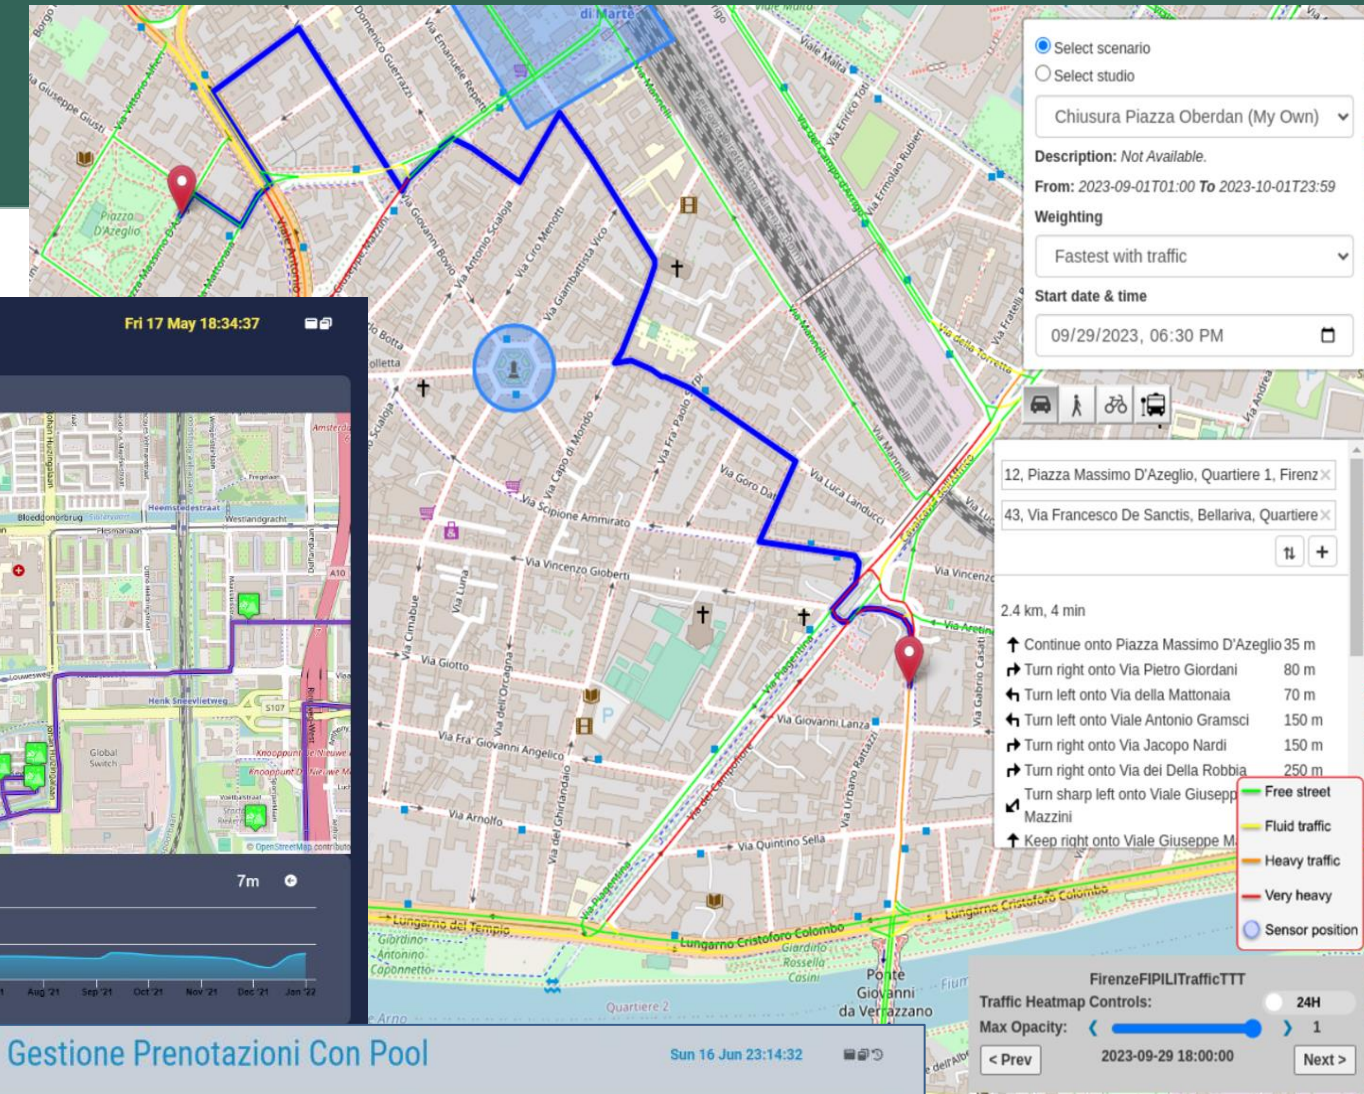

- Short Term predictions
- Reduction of costs, prevention
- Early warning of critical conditions
- Reduction of emissions
- Seasonality

AI inject:

- Deep Learning
- Data integration
- XAI addition for suggestions

Routing Optimization

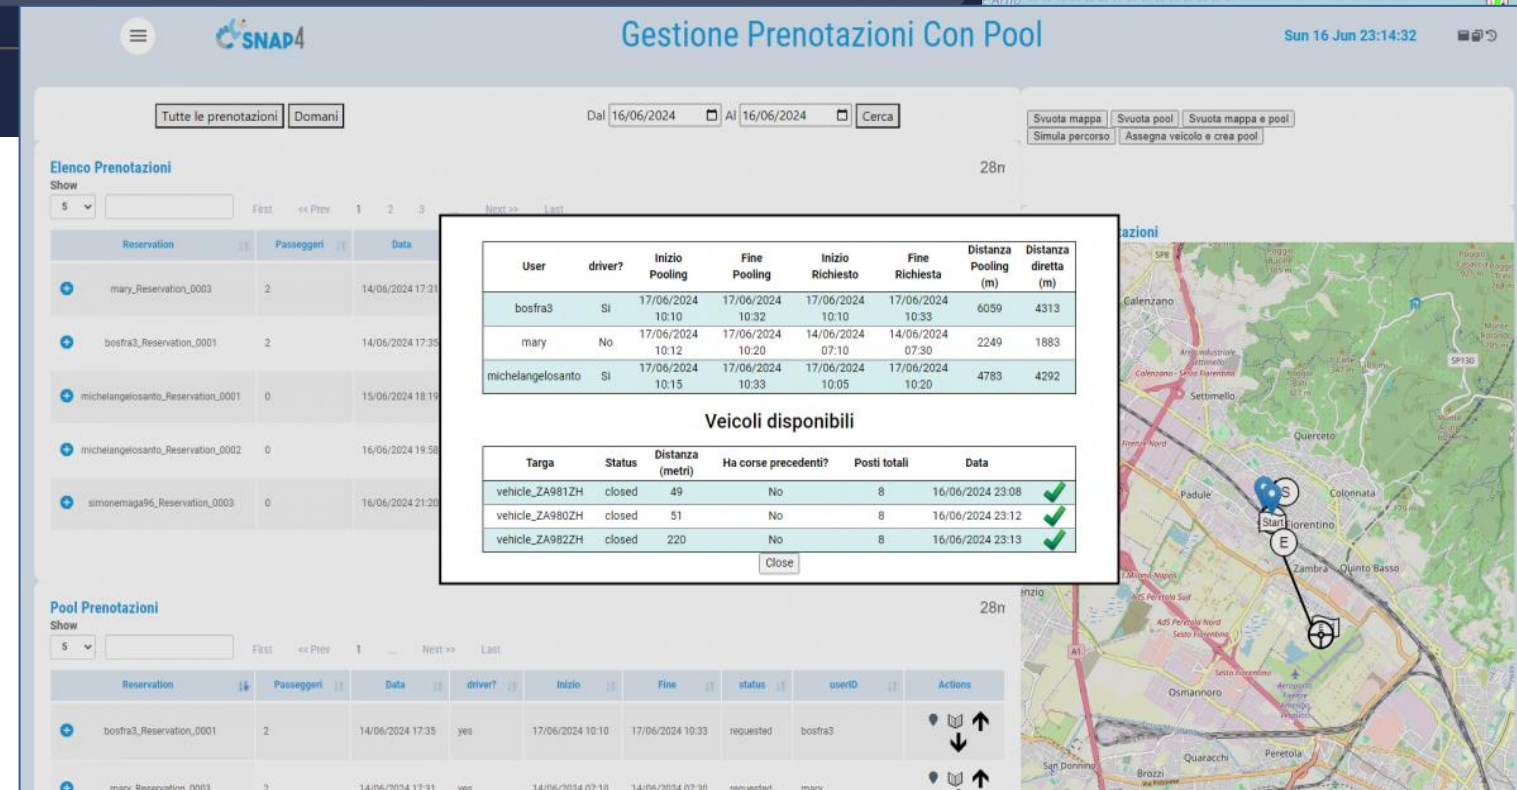

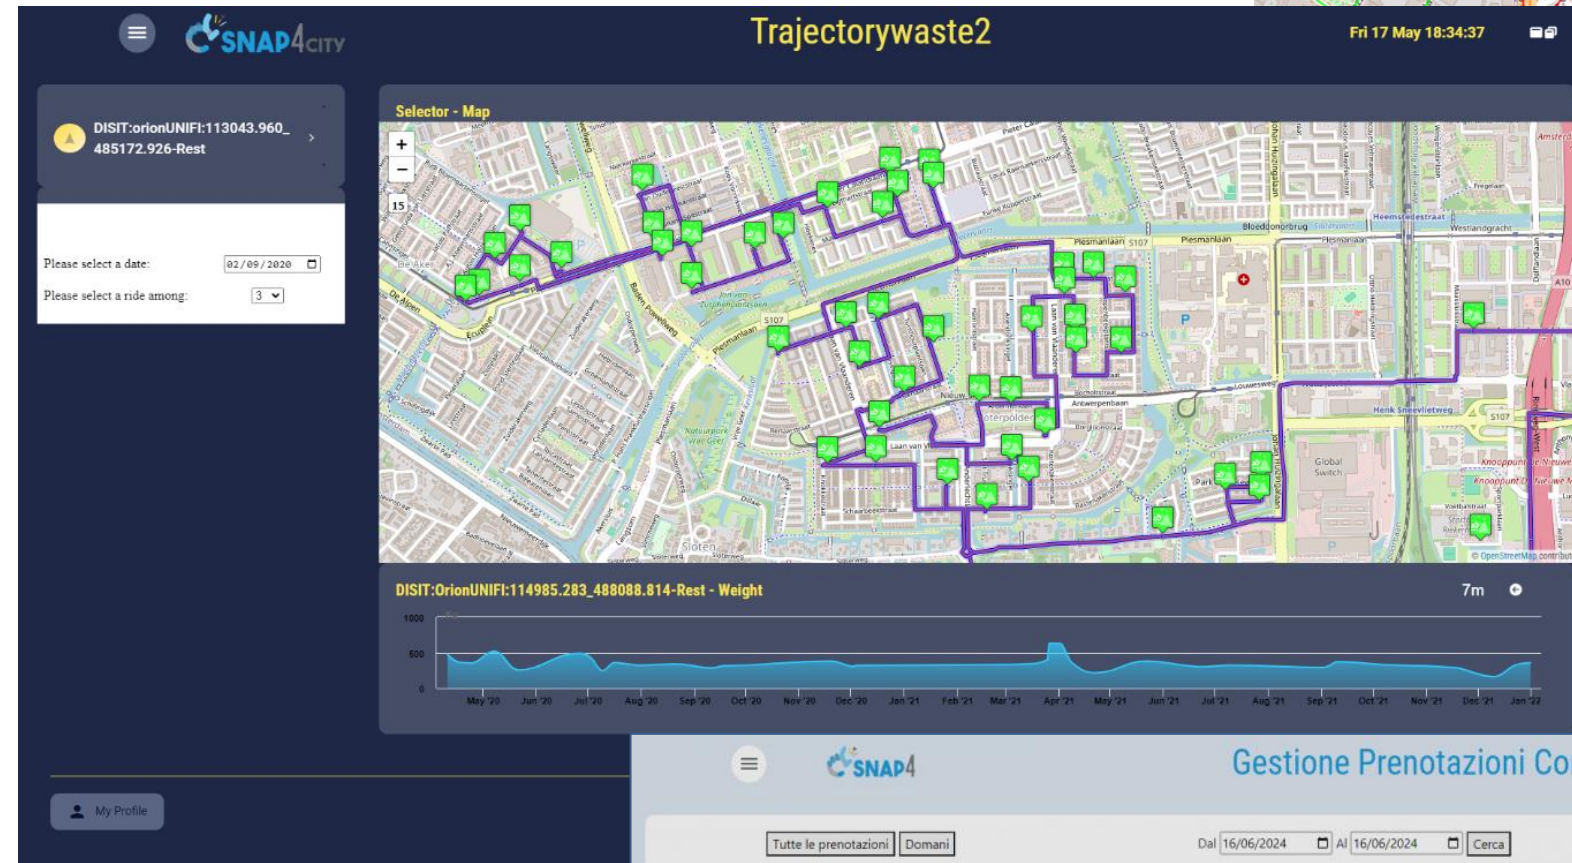

Goals on planning:

- Reduction of costs on plan
- **waste collection** optimization, Reduction of Km
- **car pooling trajectories** optimization for maximize the pool usage
- **delivering optimization**, reduction of travel time, reduction of Km
- etc.

Dynamic Routing on operation:

- React in operation to define immediate routing solutions: rescue teams, ambulance, etc.
- Recovery from failure

Traffic Light Optimization

Aims, Multiple Objectives

- Decongestion, reduction of emission
- Reduction of travel time
- Synchronization, green wave
- public and private traffic, tramway priority
- Micro and Macro Scales

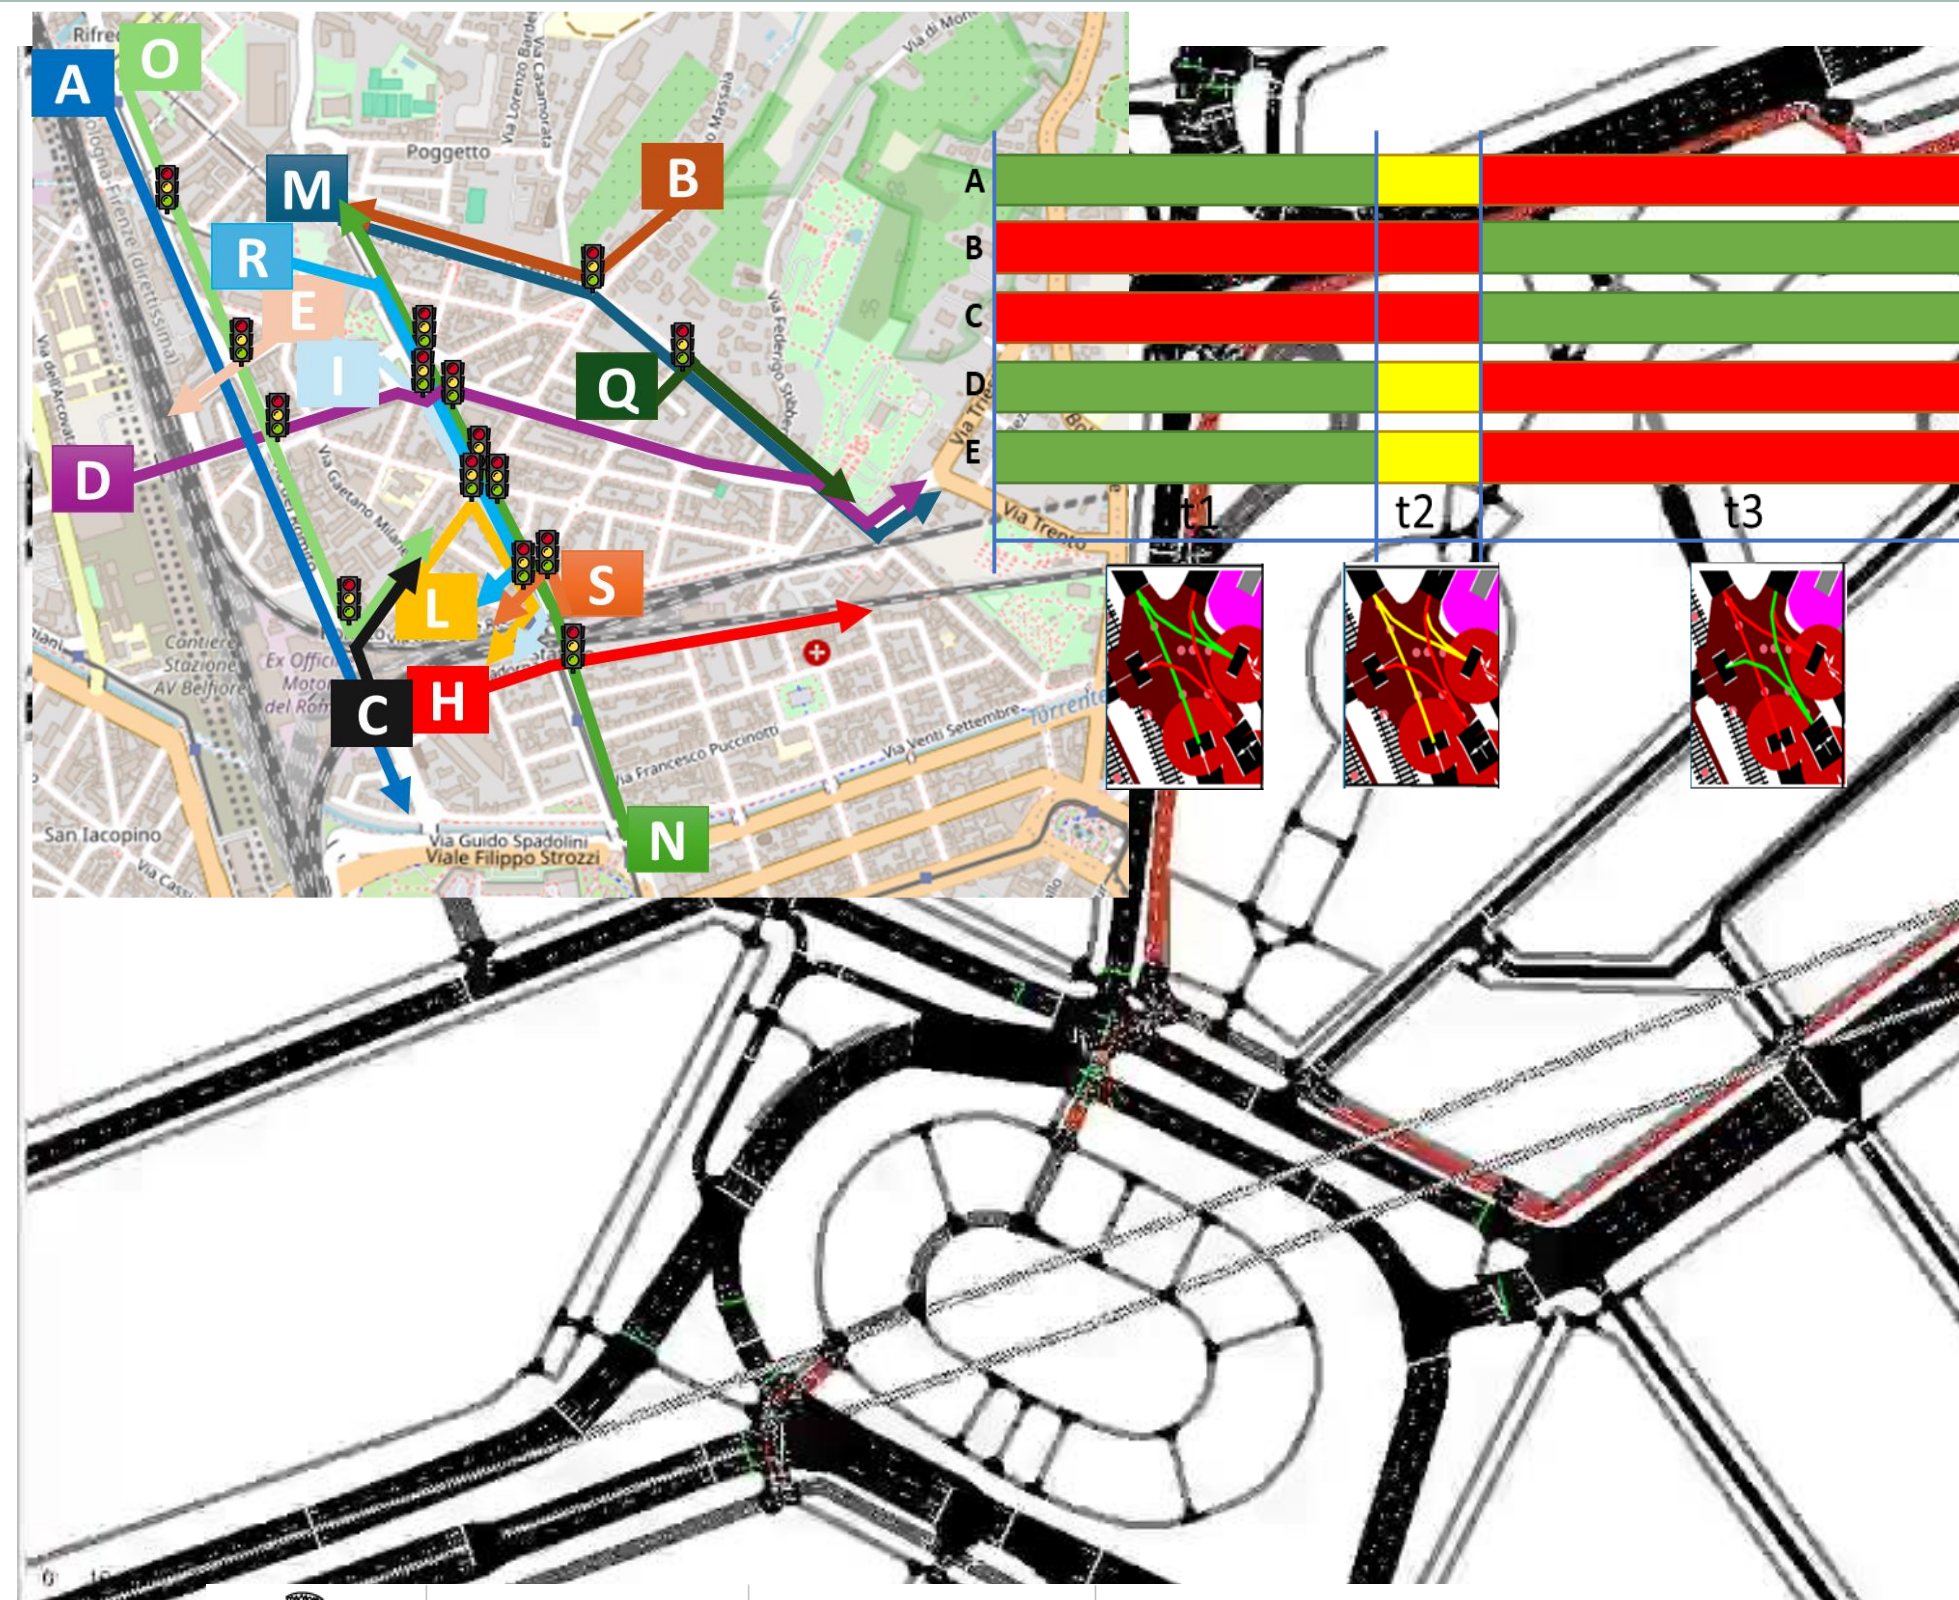

AI: Genetic Algorithms, Reinforced Learning

- Multiple Traffic Light Plan generation
- Fixed and Actuated Cycles
- Adjusted on Demand, in operation

Validation/integ. with SUMO simulation

- Travel Time, waiting time, waiting count
- Specific travel time on directions
- CO2 emissions, etc.

Reductions from 5% to 15%

What-if-Analysis and Infrastructure Optimization

Aim of Decongestion, Sustainability

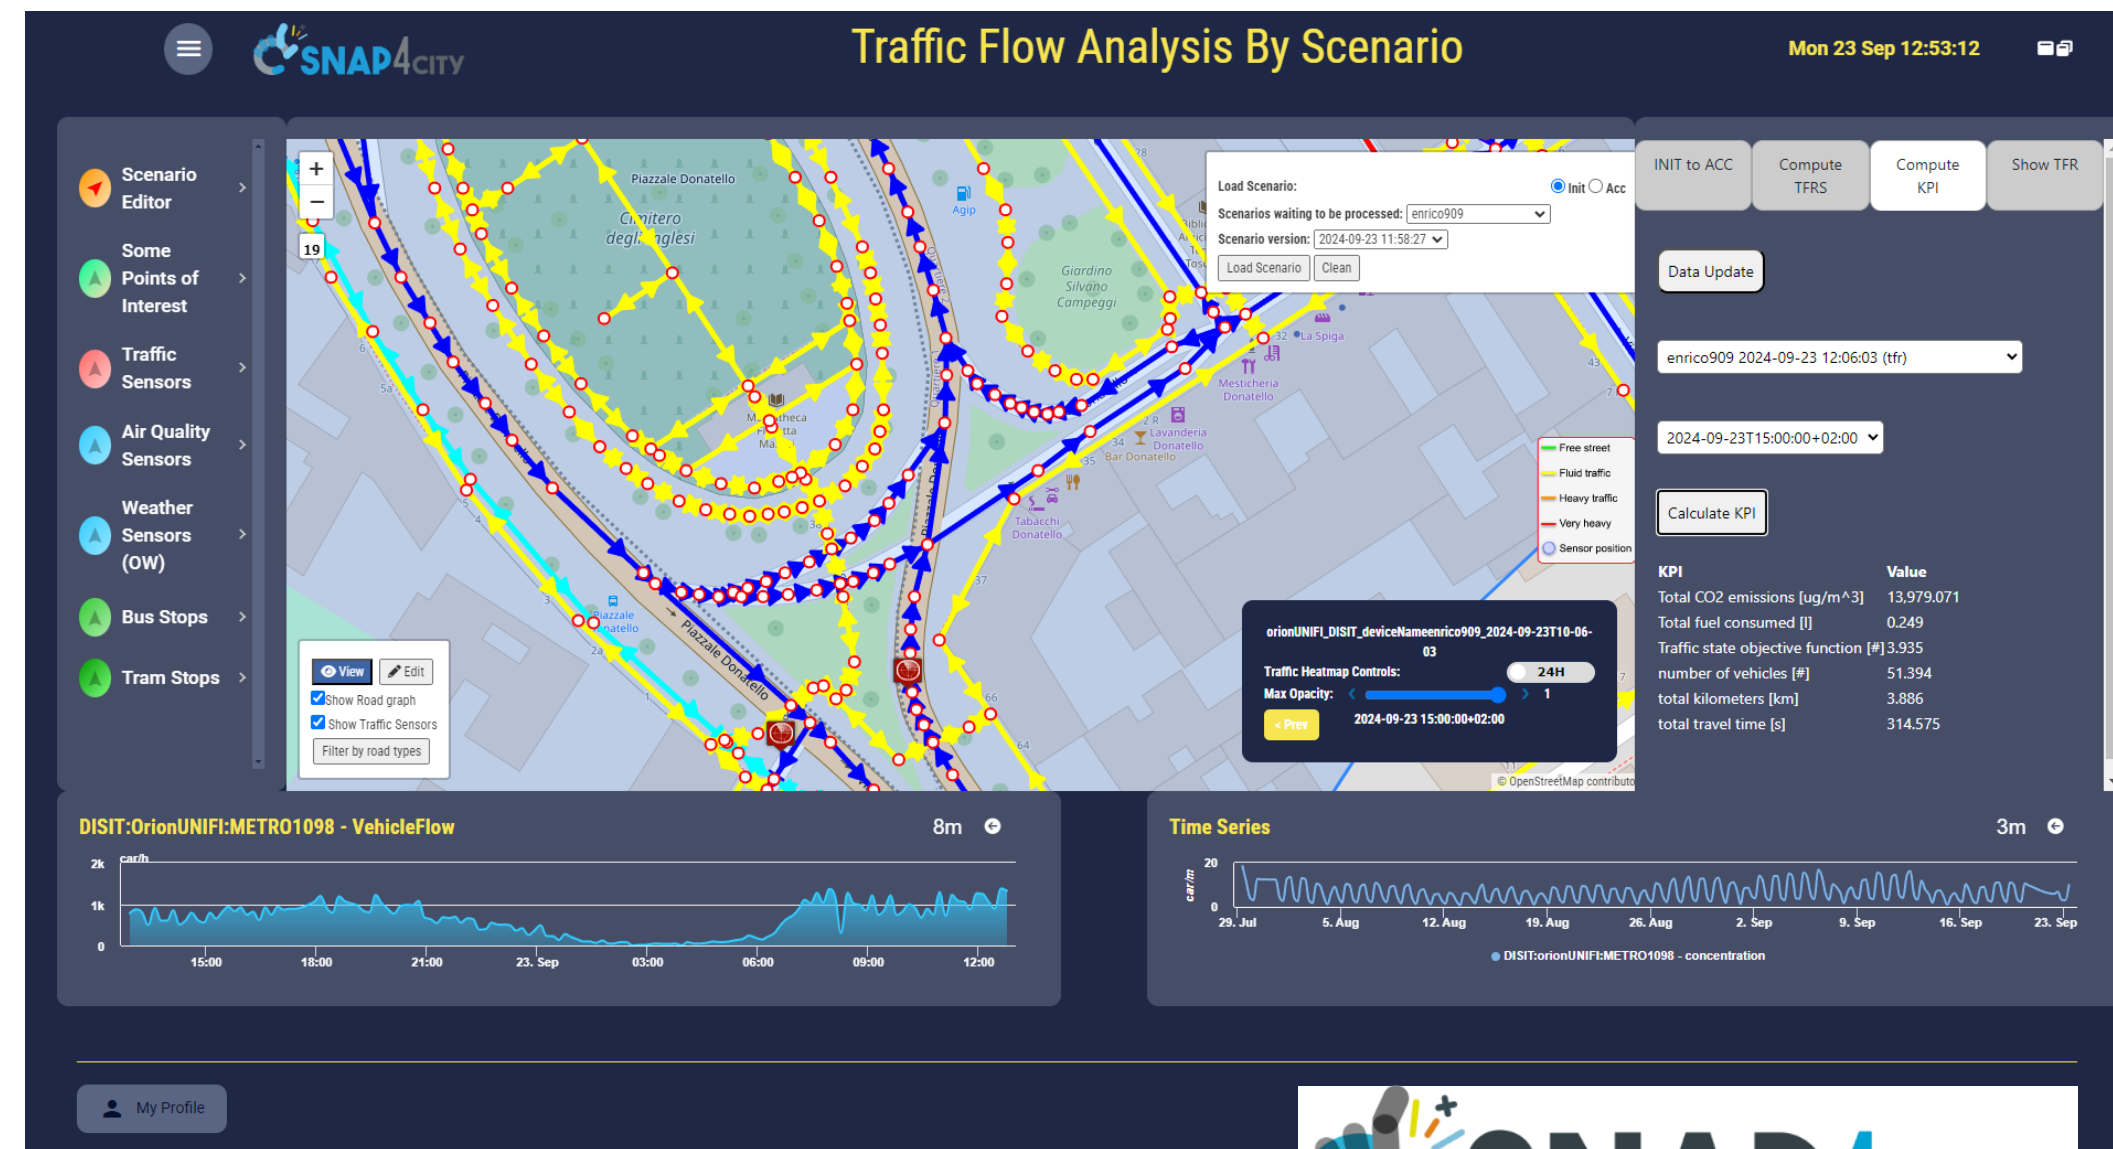

- Reduction of emissions, # stops
- Reduction of travel time

What-if analysis on Operation/Plan

- Working by scenarios making Hyp.
- Simulating the results on conditions
 - **Generative AI and/or neuro-Symbolic**
- Computing KPI and providing suggestions

Optimisation on Plan

- Making Scenario for the context
- Defining constraints and conditions
- Asking to AI to **generate best solutions**
- **Offering Optimal Solution** in terms of
 - Solutions and Explanations

Virtual Assistants, Answering systems

Aim, Cost reduction in managing

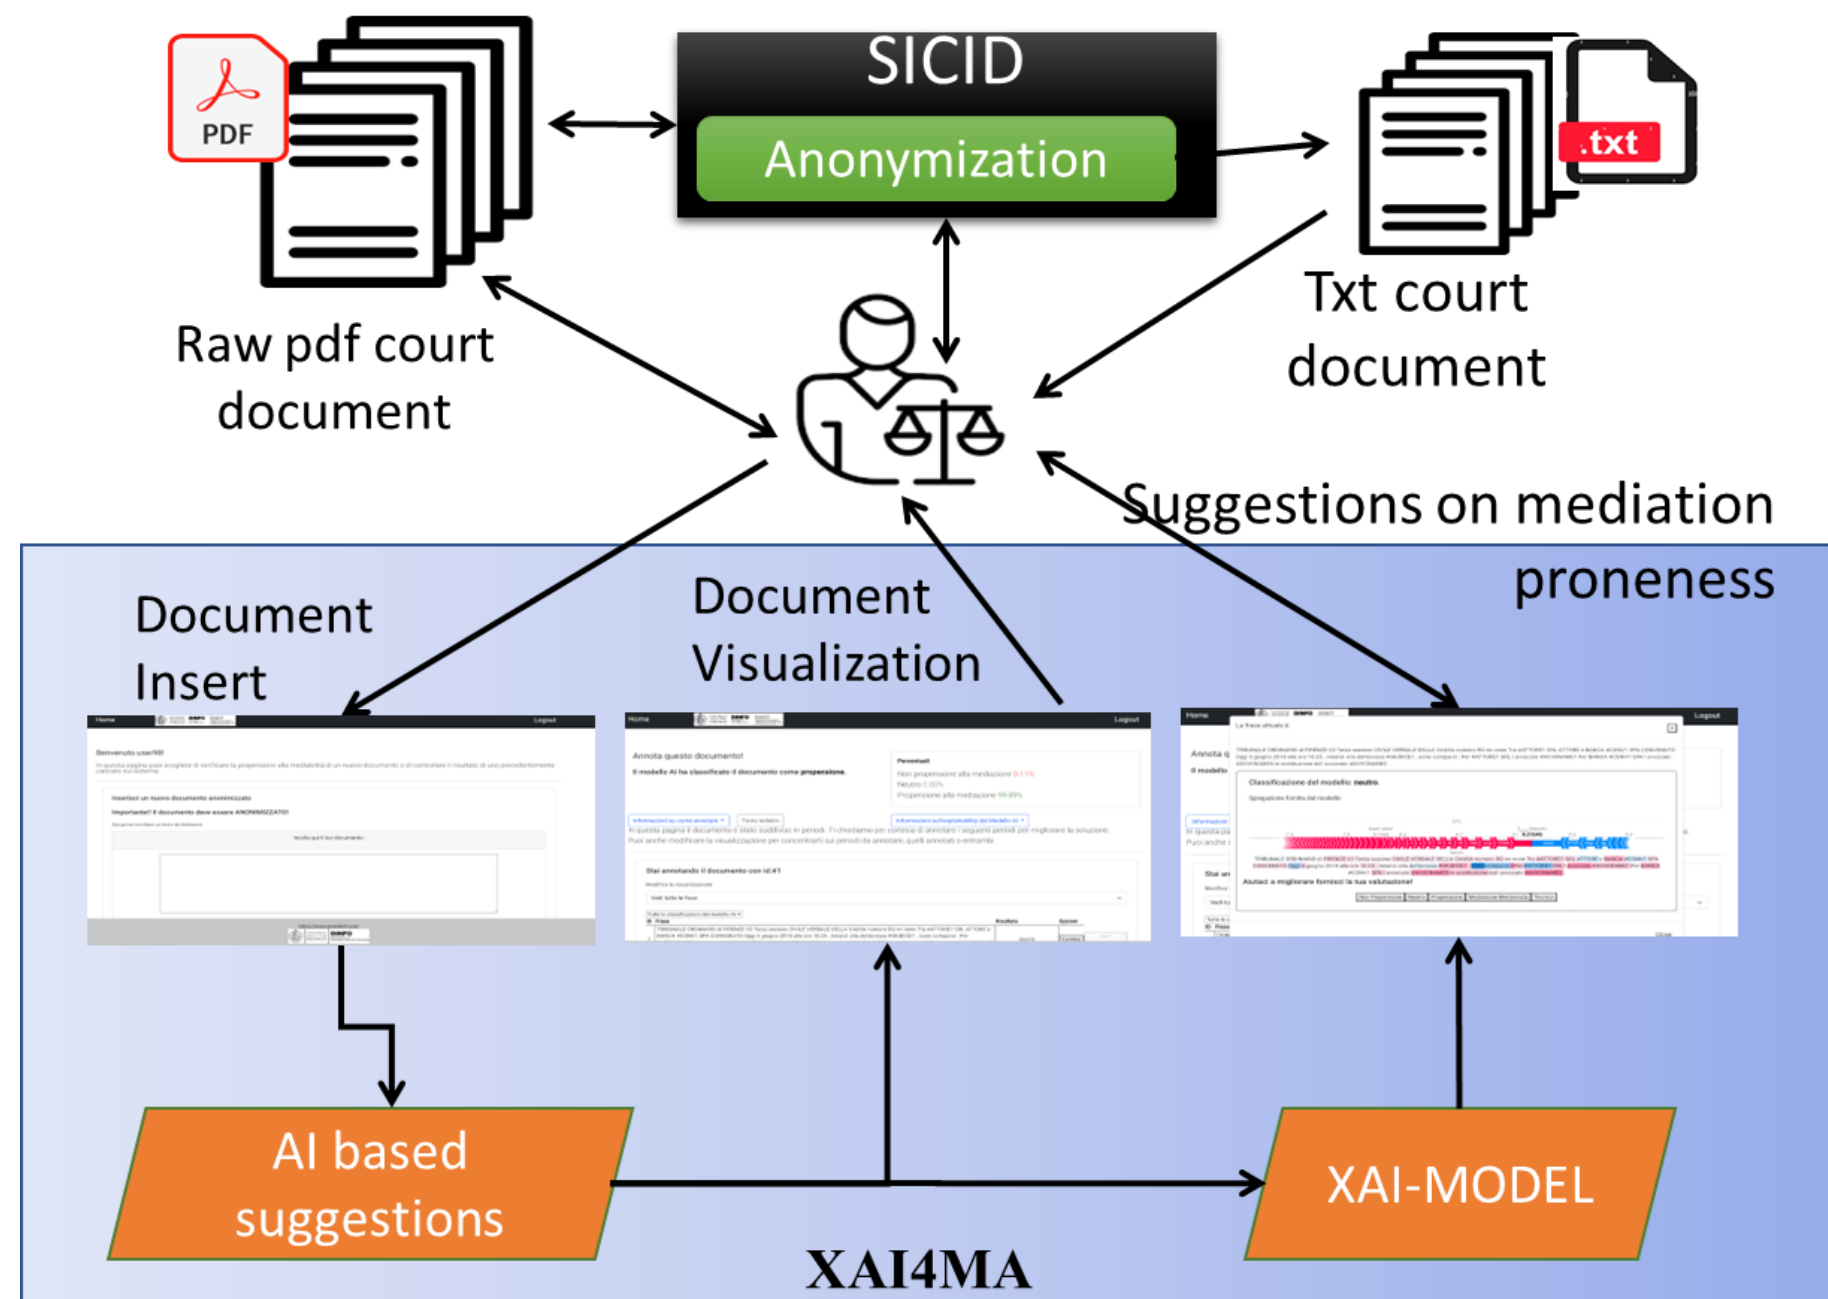

- Large volume of text, short time
- Getting fast non bias answers

AI support for:

- Text analysis and classification,
- Text comprehension, BERT/LLM
- Natural language queries and answers with LLM/RAG
- XAI support for explanations

Multiple Actual Examples

- prediction of the probability of mediation
 - Tribunale di Florence
- DSS on disputes
 - Careggi Legal Office
- Answers/Help on manuals
 - Assistant for Snap4City
- Answers on tourist information
 - PAVAL Assistant

3D MAP GLOBAL DIGITAL TWIN -NEWGUI

3D MAP

3D map interface showing a 3D model of Florence, Italy, with a traffic heatmap overlay. The map includes a sidebar with navigation and control icons, a settings panel, and a traffic heatmap control panel.

Settings Panel:

- Enable Lights
- Datetime: 02/08/2022 10:11
- Enable dynamic shadows (experimental)

Traffic Heatmap Controls:

- FirenzeFIPIITrafficRealtime
- Traffic Heatmap Controls: 24H
- Max Opacity: 1
- < Prev 2022-09-02 18:56:00

Legend:

- Free street
- Fluid traffic
- Heavy traffic
- Very heavy
- Sensor position

SERVIZI sui contenuti descritti in queste slide

TEST BEFORE INVEST

- Analisi del vostro problema
- Studi di Fattibilità
- POC con vostri dati
- Co-progettazione
- Attività di ricerca congiunta

SKILLS & TRAINING

- Corsi mutuati dai corsi universitari, su AI, ML, DL, XAI, NLP, Big Data, KE, Ricerca Operativa, Statistica, etc.
- Corsi su piattaforma
 - Digital Twin IoT Snap4City
- Corsi on demand
