# 15MinCityIndex

**What would support my neighborhood to become a 15-Minute City?**

## Using the Open Data:

We developed a data analytic tool based on municipal and national open data to assess services adequacy for people living in each 15 minutes areas of the city.

Good public transport services: bus, new tram line, train stations, cycle paths.

Careggi/Rifredi is a relevant district in Florence because of hosting the main Florence/Tuscany hospitals Careggi and Meyer, but also university headquarters and many other workplaces.

The tool supports the becoming of a 15-Minute city evaluating the service level in various domains.

# Local Digital Twin vs BIM

The screenshot displays a 3D digital twin of a building, the University of Florence, Dept. of Mathematics Uliss. The interface includes a 'Double Map' view, a control panel on the left, and a detailed information panel on the right. The information panel shows the building's ID (w43977147) and offers options to change the Level of Detail (LoD3, BIM - Skeleton, BIM - Full, LoD3\_LowRes). A legend in the bottom left corner identifies traffic levels: Free street (green), Fluid traffic (yellow), Heavy traffic (orange), and Very heavy (red), along with a sensor position icon (blue circle).
